Hursley Hack;

IBM's first Graduate and UP Hackathon

Challenge 4: Hursley House IoT Demo
Department: IoT

#sensors, #demo, #iot

Details

The Hursley Site IoT project have set up a network of sensors covering Hursley House and plan to use this to show the Internet of Things in action on site. The data being collected is temperature, light level and occupancy and this is stored every 5 minutes. Your mission, if you choose to accept it, is to use this data to create a demo with real business value that wows clients and visitors. You will have access to data from the sensors which you can use in your application.
